Introducing our Cryptocurrency Data Shop

We are excited to announce our institutional Cryptocurrency Data Shop which brings much needed in-depth market content to the crypto space for the first time. We offer tools that promote flexible analysis, design and charting accessing multiple cryptocurrency pairs offering a broad set of unique applications. User defined parameters provide our Data clients enormous flexibility while analyzing this young asset class. Markets do not move – they are moved and our analytical tools combined with our historical data offer unique information which bring insight to this young and emerging asset class. A few of our Data Shop features include:

- Pricing charts and analytics provide clients with access to crypto currency technical indicators across multiplecurrency pairs.
  - USD Bitcoin, EUR Bitcoin, YEN Bitcoin, USD Ripple and USD Ether
- Historical Data: With flexible research parameters allowing traders to effectively determine daily volatility, implied skew, as well as historical charting.
- Benchmark Indices: We are global leaders in Cryptocurrency Benchmark Indices which serve as the benchmark for a wide range of financial products.
- Our historical prices go back over 4 years which serves to promote unique and valuable data that's difficult to source anywhere else.

As the crypto currency markets continues to evolve and the needs of our market participants expand, we will react and adjust our data and product offering continuing to add value to the user experience. Today, we are excited to bring this data-rich offering to the market which combines legacy analytical tools with this burgeoning new cryptocurrency global marketplace and its participants.
